

About: This listing includes all catalogued performers in our archival collections and provides an idea of what instrument, style of music, and the total number of recordings on which you can find their music. A given performer may appear on a few songs or tunes over several tapes or may have multiple tapes entirely of their own music; so, just because a performer appears on 3 recordings (e.g. René Matte), doesn't always mean we have more of their music than someone who appears on only a single recording (e.g. Cyril Devouge)
